

INVITATION FOR EXPRESSIONS OF INTEREST OF INVESTORS INTERESTED IN CONSTRUCTION OF WIND POWER PLANTS

According to the Energy Development Strategy of Montenegro until 2025, as well as the Action plan for implementation of strategy 2008-2012, significant focus was given to the projects for development and usage of renewable energy sources, including the wind energy exploration.

The study “Estimation of the potential of renewable energy sources in the Republic of Montenegro” showed a macroscopic field of wind potential on the territory of Montenegro, and it also served as a base for choosing the locations for allocating systems for measuring and researching of wind potential. Measurements and research regarding the wind potential on several micro locations on the territories of Montenegro are currently taking place.

Ministry of Economy of Montenegro received first reports about the results of measuring and researching of wind potential on locations of Možur hill and Krnovo hill, for which it has already been proved that there is enough of wind potential available for production of electrical energy.

Reports on results of measuring and researching of the wind potential on respective locations could be found on the web page of the Ministry of economy (www.minekon.gov.me), as well as on the web page for renewable energy sources in Montenegro (www.oie-cg.me).

The Ministry of Economy would like to use this opportunity to invite all interested domestic and foreign investors with an experience in the area of renewable energy sources and exploitation of wind energy, to submit the expression of interest for construction of wind power plants on locations of Možur hill and Krnovo hill.

Expression of interest must consist of the information regarding financial and operational resources, as well as the list and short description of relevant projects and experiences in this area.

The submission of expressions of interest from potential investors does not obligate nor limit the Ministry of Economy in selecting the investor for the construction of wind energy plants later on during the process. Also, the submission of expression of interest from potential investors does not limit the right of other interested investors to respond to the Public announcement for contraction of wind power plants.

Expressions of interest are to be submitted no later than 30th of October of 2009, to the address contained in this Invitation for expressions of interest.

Ministry of Economy shall, within 7 days after the deadline for submission of the expressions of interest, according to the legal procedure, stated in the Decree for Wind Energy Plants, publish the Public announcement for the selection of investors for construction of wind energy plants on these respective locations.

The purpose of such call is the promotion of strategic goals of the Government of Montenegro in the energy sector, in order to stimulate the development of renewable energy sources, while at the same time complying with the principles of environment protection, as well as the process of managing natural and man-made resources.

All interested investors could contact us at the following addresses, in case any additional information is needed:
